This unwavering commitment to excellence makes us one of the **best IVF centers in Noida, Greater Noida, and Noida Extension, Delhi NCR**.

Following services are offered at Best IVF Centre in Noida & Greater Noida:

IUI (Intra Uterine Insemination) with Self & Donor Sperm

IUI is the process by which washed sperms (best quality) are injected into the uterus of the female patient. It is a safe and effective treatment for couples who have problems in cervix, have poor sperm count with low motility or suffer from premature ejaculation. IUI works by putting sperms directly into your uterus around the time you're ovulating, helping the sperm get closer to your egg.

IVF (In Vitro Fertilization)–ET (Embryo Transfer)

IVF treatment can offer a solution for **fertility problems** experienced by both men and Women. In IVF, the female's eggs are fertilized with the male's sperm in a laboratory to create an embryo. The embryo is later transferred to the uterus of female and after some time, she is tested for pregnancy.

ICSI (Intracytoplasmic sperm injection) –ET (Embryo Transfer)

It is a type of **IVF treatment** used to address severe cases of **malefactor infertility**. It involves the use of specialized micromanipulation tools and equipment that allow embryologist to identify good quality sperms with a special needle and inject it directly In to the egg.

IVF with Donor Eggs

IVF with donor eggs offers a solution for women who are unable to produce viable good quality eggs for fertilization with their partner's sperm. Egg are instead provided by an anonymous egg donor and once fertilized, the resulting embryo is implanted in the female partner to achieve pregnancy.
