

NOVOFLEX

Engineering Reliable Fastening & Wiring Solutions Since 1980

About Novoflex

Established in 1980, Novoflex is an Indian manufacturer of engineered fastening, wiring, and cable management components serving OEMs and industrial manufacturers. With over four decades of manufacturing experience and a portfolio exceeding 1,500 engineered components, the company focuses on engineering precision, manufacturing discipline, and long-term supply reliability.

Our Core Business

Novoflex designs and manufactures engineered plastic and metal components used in fastening, cable management, cable entry, wiring support, and PCB assembly. The company supports OEMs, Tier-1 suppliers, equipment manufacturers, and industrial procurement teams with consistent, scalable manufacturing.

Core Services

- Engineered cable management components
- Fastening components
- Cable entry and protection solutions
- PCB support components
- Application-specific manufacturing support

Industries Served

Automotive, Electrical & Electronics, Industrial Machinery, Automation, Renewable Energy, Telecommunications, Railways, Shipbuilding, Food Processing, Pharmaceuticals, Infrastructure, and Aerospace support environments.

Manufacturing Excellence

Manufacturing is centred on engineering precision, repeatable quality, process stability, scalable production capability, and long-term product reliability.

Quality

Operations are supported by ISO 9001:2015, IATF 16949:2016, RoHS compliant manufacturing, ZED Gold certification, CE marking where applicable, and product testing by recognised laboratories including UL and TÜV Nord where applicable.

Why Novoflex

Customers value Novoflex for dependable manufacturing, broad product coverage, engineering-led development, consistent production quality, and long-term supply stability.
